

EXECUTION BROCHURE

2026

DELIVERING INDUSTRIAL PERFORMANCE

Wise Group transforms engineering into reality through integrated industrial execution capabilities

Combining workshops, field operations and strong technical expertise,
We deliver construction, fabrication, installation and maintenance services across multiple industries
Ensuring reliability, safety and performance in complex environments.

Our execution model is built on one principle : control of the full value chain, from fabrication to commissioning and maintenance.

OUR APPROACH

We execute projects with a focus on :

- Operational reliability, even in constrained environments ;
- Quality and compliance, in line with international standards ;
- Local capability, ensuring responsiveness and efficiency ;
- Integration, reducing interface risks between engineering, procurement and construction.

SCOPE OF SERVICES

CONSTRUCTION & INDUSTRIAL FABRICATION

We deliver high-quality industrial construction aligned with international standards :

- Piping and welding (API / ASME / ISO standards) ;
- Boiler-making and metal fabrication (carbon steel, stainless steel) ;
- Hydrocarbon, chemical and industrial storage tanks ;
- Structural steel and industrial civil works (foundations, supports) ;
- Workshop and site fabrication & assembly.

PROCESS EQUIPMENT & SKID FABRICATION

We design and manufacture modular systems adapted to industrial processes :

- Process skids (pharma, agro-industrial, water treatment) ;
- Pumping systems and filtration units ;
- Stainless steel equipment fabrication.

INSTALLATION, COMMISSIONING & FIELD SERVICES

We ensure safe and efficient deployment on site and offshore :

- Industrial plant installation and assembly ;
- Equipment installation and integration ;
- Commissioning and operational readiness support ;
- Offshore manpower and field services.

MECHANICAL SERVICES & MACHINING

We provide advanced mechanical services and reinforce local industrial capacity :

- Precision machining and parts manufacturing ;
- Gear cutting, shaft machining and mechanical components ;
- Engine overhaul, reconditioning and rebuilding ;
- Rotating equipment maintenance and alignment (laser alignment) ;
- OEM-supported maintenance (diesel engines, generators, industrial equipment).

MAINTENANCE & ENERGY SYSTEMS

We ensure long-term performance of industrial assets :

- Preventive and corrective maintenance programs ;
- Maintenance of power generation systems (diesel, generators) ;
- Solar plant installation and maintenance contracts ;
- Asset performance optimization.

VALUE DELIVERED

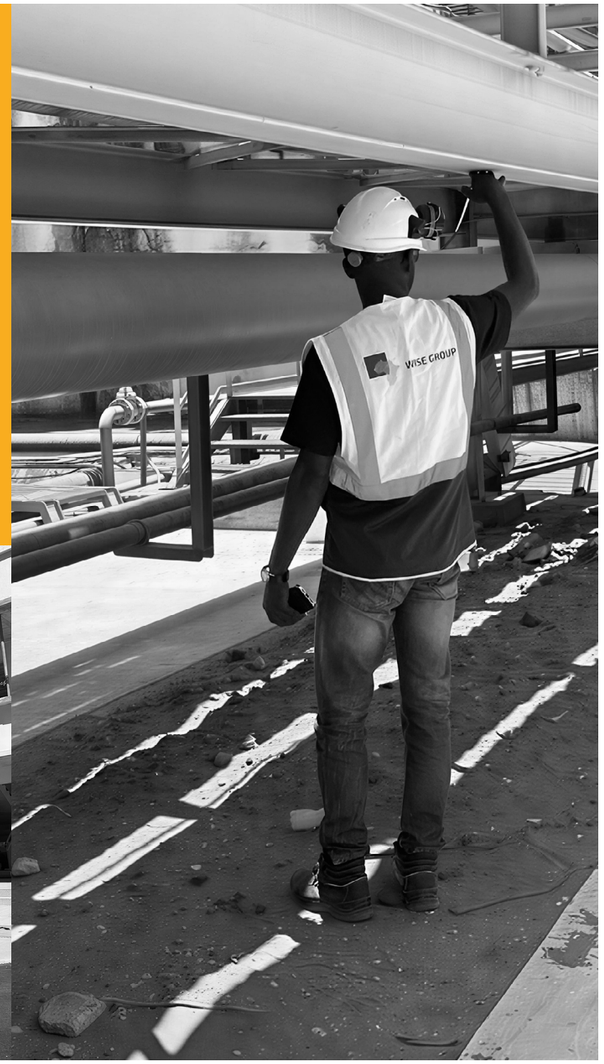

- Reliable delivery in complex environments ;
- Reduced downtime ;
- Controlled execution costs ;
- Strong local operational capability.

TECHNICAL CAPABILITIES

- Workshop facilities (machining, fabrication, repair) ;
- Field execution teams ;
- Offshore operational support.
