SUSTAINING INDUSTRIAL PERFORMANCE

Wise Group provides the expertise, resources and regulatory support required to deploy and operate industrial projects efficiently in complex environments.

**We act as a strategic local partner,
enabling clients to navigate
operational, regulatory and human challenges
while ensuring compliance, performance and sustainability.**

OUR APPROACH

Our expertise is built around :

- Operational support, close to field realities ;
- Regulatory mastery, ensuring full compliance ;
- Human capital, deploying the right expertise at the right time ;
- Local integration, aligning projects with local content requirements.

SCOPE OF SERVICES

TECHNICAL ASSISTANCE & PROJECT SUPPORT

We reinforce projects with targeted expertise and operational support :

- Engineering support and site-based technical assistance ;
- Project Management Consultancy (PMC) ;
- Deployment of skilled personnel for projects and operations ;
- Offshore manpower provision.

COMPLIANCE & REGULATORY MANAGEMENT

We ensure full alignment with regulatory environments and contractual obligations :

- Full compliance with local labor laws and fiscal regulations ;
- Management of administrative, legal and employment frameworks ;
- Alignment with local content requirements and contractual obligations ;
- Support for international companies operating in local environments ;
- Risk mitigation related to workforce, mobility and regulatory constraints.

WORKFORCE, MOBILITY & LOCAL CONTENT

We structure workforce strategies aligned with project and country requirements :

- Recruitment and deployment of qualified local and international workforce ;
- Expatriate management and global mobility ;
- Development of local workforce in line with project requirements ;
- Support to local content strategies and national workforce integration.

PROCUREMENT, SUPPLY & LOGISTICS EXPERTISE

We manage complex supply chains across international environments :

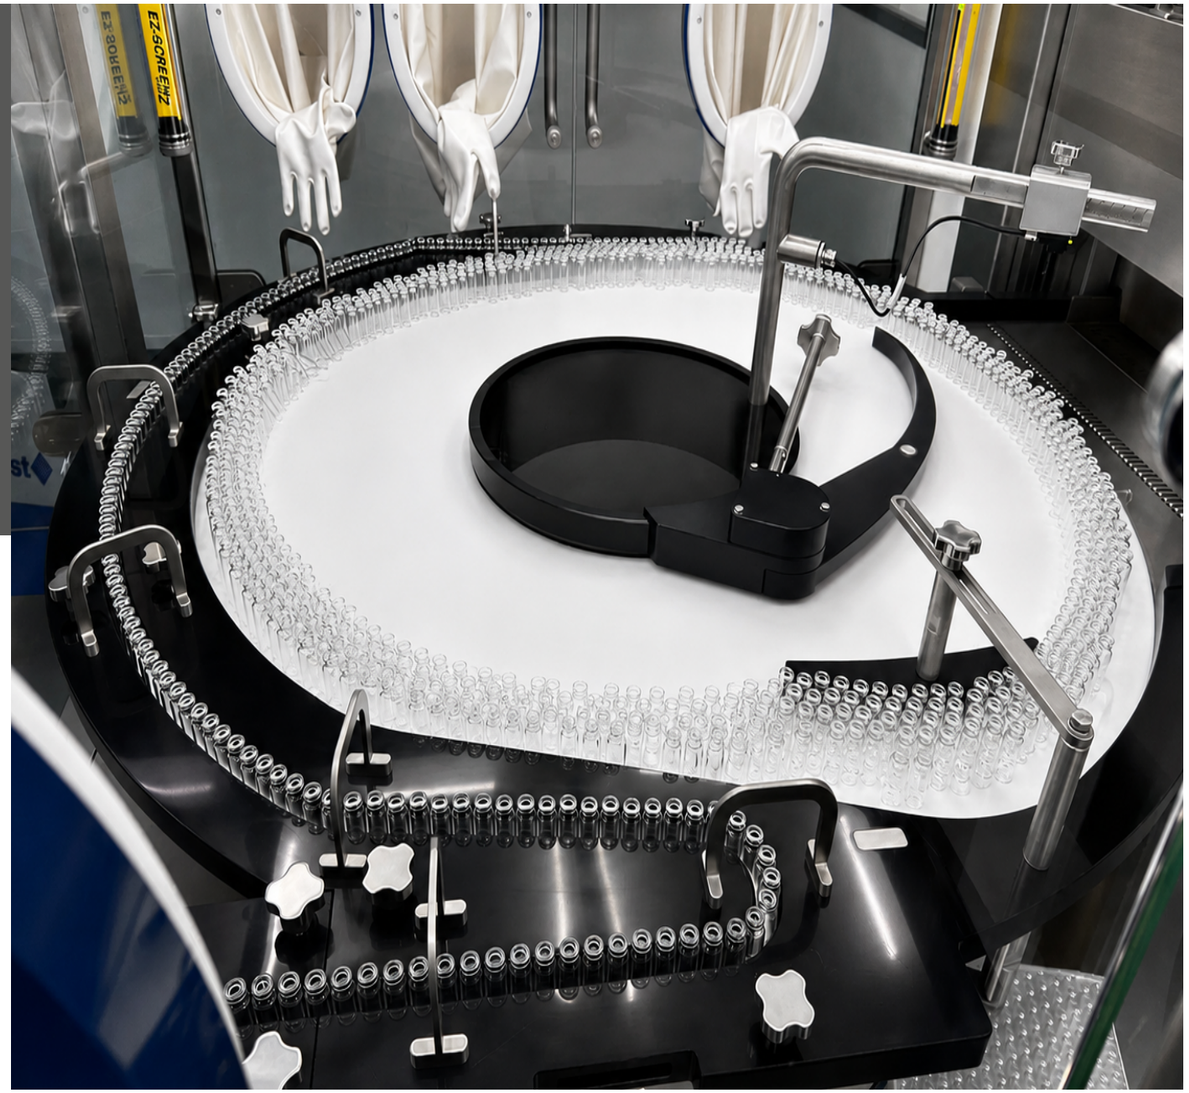

- Equipment sourcing and supplier selection (OEM & partners) ;
- Procurement aligned with engineering and project requirements ;
- Import / export coordination and customs compliance ;
- End-to-end logistics management (documentation, transit, delivery) ;
- Europe / Africa supply chain operations.

TRAINING & CAPABILITY DEVELOPMENT

We strengthen operational excellence through knowledge transfer and training :

- Technical training programs (workshops and field-based) ;
- On-site and certified training ;
- Knowledge transfer and skills development ;
- Partnerships with international training centers.

TECHNICAL VALUE

- Ability to mobilize qualified resources quickly ;
- Support for complex and remote operations ;
- Integration of local and international expertise ;
- Optimization of procurement decisions.

APPLICATIONS

- Industrial projects ;
- Offshore operations ;
- Maintenance campaigns ;
- Workforce scale-up.

VALUE DELIVERED

- Flexible resource deployment ;
- Enhanced operational continuity ;
- Strengthened local capabilities ;
- Improved procurement efficiency.
